SUPPLEMENTARY INFORMATION: The Status Report presents a description of Committee findings and observations to date by the co-chairs based on Committee activities conducted through July 1995. A projection of future Committee efforts also is included. The Status Report was submitted in response to a request by the Secretary at the first meeting of the Committee (in March 1995) for an interim report. The Committee's final recommendations will be submitted by the end of 1995 to the Secretary of Energy, and to the White House Office of Management and Budget and the Council on Environmental Quality.

The purpose of the Committee is to provide the Secretary of Energy, the White House Council on Environmental Quality, and the Office of Management and Budget with advice, information, and recommendations on how new and existing Department of Energy (DOE) nuclear facilities and operations, except those operations covered under Executive Order 12344 (Naval Propulsion Program), might best be regulated with regard to safety. The Department currently self-regulates many aspects of safety at nuclear facilities, pursuant to the Atomic Energy Act of 1954, as amended. The Committee consists of 25 members drawn from Federal and State government and the private sector, and is co-chaired by John F. Ahearne, Executive Director, Sigma XI, The Scientific Research Society, and Gerard F. Scannell, President of the National Safety Council. Members were chosen

with environment, safety, and health backgrounds, balanced to represent different public, Federal, State, Tribal, regulatory, and industry interests and experience.

Issued at Washington, DC on August 21, 1995.

Thomas H. Isaacs,

Executive Director, Advisory Committee on External Regulation of Department of Energy Nuclear Safety.
